

Quick Open Closures

Seg-Band Type

Salient Features

- Opens in minutes compared to conventional bolted flanged closures
- Requires no tools to operate & maintain
- Closures designed to meet ASME BPVC Section VIII Div. 1
- Finite element analysis software optimized design
- Sizes available from DN300 to DN1000
- Pressure ratings available from ASME Class 150 to Class 900
- Fluid service compatible O ring options
- Closures built with Code stamping as option
- Horizontal or vertical configuration
- Pressure warning bolt as per UG-35

Applications

- On process vessels like filters, separators, coalescers, strainers
- On pipeline equipment like pig launchers & receivers

Materials of Construction

- ASTM A350 LF2 / ASTM A516 70N (Hub & Door)
- ASTM A182 F316 / ASTM A240 Typ 316 (Hub & Door)
- Viton O ring
- Other materials of construction on request
- NACE MR 0175 / TM 0824 compliant materials on request

Industries Used In

- Oil & Gas Production
- Petrochemical Mfg.
- Aviation
- Petroleum Refining
- Environmental
- Marine
